

RACE - GIPPSLAND

"Raising Aspirations in Careers and Education - Gippsland"

Food and Fibre School to Industry Partnership Programs

Agriculture is the fastest growing industry in Australia and needs:

People who are communicators, investigators, entrepreneurs, and problem solvers

People who want to get out in the field, into the office, into the lab, and into the classroom.

People who want to work with ideas and people who can make these ideas a reality.

People who can see the bigger picture and people who delve into the details.

Our Food and Fibre School to Industry Partnership Program pairs industry champions and schools together to create a tailored program for students to explore the exciting world of agricultural work in Gippsland. Students will also have the opportunity to step outside of the school environment and immerse themselves in their industry partner's workplace.

All-day or part-day Industry visits will be facilitated by a RACE Gippsland team member to ensure schools are supported and the administrative burden reduced. Transport costs are included in this fully funded program, with buses leaving from your school. Surveys for students and teachers allow us to design a program that meets student interest and class learning objectives.

Join us on Tuesday 16 May as part of the Youth in Agritech Expo
